

*La Nuova Sansone srl* was founded in 1991 from the similarly-named company created By Benito Giannelli in the 1980s. With great passion, he was able to put his previous experience to good use. La Nuova Sansone produces containers made from stainless steel for the conservation of foodstuffs.

The company is very active in the domestic market and is growing fast abroad. The product range consists of canisters and barrels and other containers designed and projected to contain liquids, foodstuffs such as oil, wine, honey, and also, if needed, peas, beans, other legumes and pharmaceuticals.

The material used for the production is stainless steel 18/10 – Aisi 304 (DIN1,4301) that guarantees the best results in terms of product life and hygiene. The quality system of LA NUOVA SANSONE SRL has been found to conform to quality system standard UNI EN ISO 9001:2000.

### Why is Roar Equipment & Sansone the right choice?

**Affordable quality**

**Made with passion**

**Maximum hygiene**

**Made in Italy**

**60 years know-how**

**After sales support**

**THE JEWEL – WELDED KITCHEN CANISTER**

PERFECT ADDITION TO YOUR STORE!

Supplied in a box, with a tap (faucet) with removable protective seal.

Stainless steel tap (faucet), ½ inch (12,7 mm), handle and pvc stand included.

2	0.66	130	172	100	1/2
3	0.78	150	184	100	1/2
5	0.94	150	196	100	1/2

Non drip tap

The material used for production is stainless steel that guarantees the best results in terms of product life and hygiene

### NSF WELDED DRUMS EUROPA MODE

Our welded drums are made in accordance to the most rigorous quality standards.

A special butt welding makes cleaning easier and avoids any accumulation of organic parts and residues, potential carriers of bacteria.

Capacity (litres)	Weight (kg)	Height (mm)	Base (mm)	Opening (mm)	Tap (inches)
10	2.05	240	280	130	1/2
15	2.40	310	280	130	1/2
25	4.20	320	360	230	1/2
30	4.50	360	360	230	1/2
50	5.40	440	420	230	1/2

Non drip tap

The material used for production is stainless steel that guarantees the best results in terms of product life and hygiene

### CONTAINERS FOR HONEY STORAGE

Our containers are designed for honey storage in any place.

Equipped with a structure that prevents the remaining residue in the joints of the container makes this product to be used both by individuals and by those who sell honey in bulk.

Their tap is designed for high viscosity material such as honey and is completely made of stainless steel.

Capacity (litres)	Weight (kg)	Height (mm)	Base (mm)	Opening (mm)	Tap (inches)
10	2.05	240	280	130	1/2
15	2.40	310	280	130	1/2
25	4.20	320	360	230	1/2
30	4.50	360	360	230	1/2
50	5.40	440	420	230	1/2

Secure Honey Gate

The material used for production is stainless steel that guarantees the best results in terms of product life and hygiene
